

FRAGOLTHERM® DPO

Heat Transfer Fluid 12 °C to 400 °C

Application

FRAGOLTHERM® DPO is a high-temperature-stable heat transfer fluid for use in temperature-critical systems. Typical fields of application are, for example, production of synthetic fibers and fine chemicals, Concentrated Solar Power (CSP) and plastics recycling.

FRAGOLTHERM® DPO can be used in the vapor phase as well as in the liquid phase up to 400 °C. In the liquid phase the product can be used pressureless at a temperature range between 12 °C and 257 °C and pressurised up to 400 °C. The film temperature at the heater must not exceed 430 °C.

FRAGOLTHERM® DPO crystallizes below 12 °C, but without volume expansion. On pipelines and on system components in which the fluid is not constantly flowing or where temperatures are under 12 °C, a heat tracing should be provided.

Also with use in pressureless ranges in the liquid phase a nitrogen blanket is recommended in the expansion tank, in order to prevent premature ageing.

Quality

FRAGOLTHERM® DPO is an eutectic mixture of 73.5 % diphenyl oxide and 26.5 % biphenyl. Therefore the product can be used in the vapor phase as well as in the liquid phase. Additionally **FRAGOLTHERM® DPO** is miscible with other comparable composed products.

FRAGOLTHERM® DPO shows a high thermal stability and thus provides a long service life. The application of **FRAGOLTHERM® DPO** in the vapor phase allows an exact temperature control in sensitive plant equipment.

FRAGOLTHERM® DPO is non-corrosive and is compatible with materials conventionally used in heat transfer technology.

Packaging

FRAGOLTHERM® DPO is available in steel drums and pails.

Notes

Please note that thermal or oxidative decomposition may cause an increase in low and high boiling substances when using heat transfer fluids even below the maximum specified bulk temperature.

When handling the product it is essential to observe the safety data sheet.

Please get in touch with us if you require further information or general technical advice.

Properties

FRAGOLTHERM® DPO		Method
Density @ 20 °C	[kg/m³]	1064
Viscosity @ 40 °C	[mm²/s]	2.48
Viscosity @ 100 °C	[mm²/s]	0.99
Pourpoint	[°C]	12
Flash point	[°C]	110
Boiling point @ 1013 mbar	[°C]	257
Max. film temperatur	[°C]	430
Max. bulk temperatur	[°C]	400
Dangerous goods according to IATA/IMDG/ADR	[·]	yes
